Source (preview): Nvidia and AMD agreed to share 15 per cent of their revenues from chip sales to China with the U.S. government, a U.S. government official said on Sunday, in an unusual move likely to faze American companies. U.S. President Donald Trump's administration halted the sale of advanced computer chips to China in April over national security concerns, but Nvidia and AMD revealed in July that Washington would allow them to resume sales of the H20 and MI308 chips, which are used in artificial intelligence development. The official, who insisted on anonymity to discuss a policy not yet formally...

Source (preview): Investing Visual arts See all topics Follow New York — Eastman Kodak, the 133-year-old photography company, is warning investors that it might not survive much longer. In its earnings report Monday, the company warned that it doesn't have "committed financing or available liquidity" to pay its roughly \$500 million in upcoming debt obligations. "These conditions raise substantial doubt about the company's ability to continue as a going concern," Kodak said in a filing. Kodak aims to conjure up cash by ceasing payments for its retirement pension plan. It also said that it doesn't expect...

Source (preview): Asia China Tariffs Donald Trump See all topics Follow The United States and China agreed to pause tariff hikes on each other's goods for an additional 90 days, according to an executive order signed by President Donald Trump on Monday. Without the agreement, tariffs were set to immediately surge, risking a return to ultra-high levels that had formed an effective blockade on trade between the world's two largest economies. The news, first reported by CNBC, comes hours ahead of a 12:01 am ET deadline when tariffs on Chinese goods were set to rise to 54% from 30%, and Chinese tariffs on...

Model Summary: The tariffs were set to rise to 54% from 30% from 10%. the extension comes after the u.s. imposed a slew of "reciprocal" tariffs on trading partners around the world. the tariffs have raised the cost of imports to levels not seen since the Great Depression. the extension is based on the bilateral negotiations that took place in.

Source (preview): Nvidia and AMD to pay 15% of China chip sales to US Trump on Monday dismissed security concerns, saying the chip in question was "old". Security experts, including some who served during President Donald Trump's first term, recently wrote to the administration expressing "deep concern" that Nvidia's H20 chip was "a potent accelerator" of China's AI capabilities. The US had previously banned the sale of powerful chips used in areas like artificial intelligence (AI) to China under export controls usually related to national security concerns. Chip giants Nvidia and AMD have agreed to pay the...
